Policy tester

The policy tester evaluates the last seen identity of active users. Login decisions may differ if there are changes to user attributes evaluated by this policy.

Test policies

Authentication NEW

Configure identity providers and multi-factor authentication for this application.

Identity

MFA

Accept all available identity providers

☐

Choose available identity providers for this application

Select available identity providers

Apply instant authentication

Allow users to skip identity provider selection when only one login method is available.

Authenticate with Cloudflare One Client

Allow users to connect automatically to this application when they have an authenticated session with the Cloudflare One Client. Your device enrollment permissions must allow Cloudflare One Client Authentication.
